

Newport Hills Community Association
Assessment and Reserve Funding Disclosure Summary
For the fiscal year ending 12/31/18
 ("Disclosure Summary")

The notes at the end of this Disclosure Summary should be read in conjunction with the information provided.

(1) The regular assessment for the 2018 fiscal year per ownership interest is \$1,308.00 annually, or \$654.00 semi-annually due on January 1, 2018 and July 1, 2018.

(2) Additional regular or special assessments that have already been scheduled to be imposed or charged, regardless of the purpose, if they have been approved by the association's Board of Directors (the "Board") and/or members:

Date assessment will be due:	Amount per ownership interest per month or year (If assessments are variable, see note immediately below):	Purpose of the assessment:
N.A.		

Total: _____

(3) Based upon the most recent reserve study, dated 9/15/17, and other information available to the Board of Directors, will currently projected reserve account balances be sufficient at the end of each year to meet the association's obligation for repair and/or replacement of major components during the next 30 years?

Yes No

(4) If the answer to #3 is "no," what additional assessments or other contributions to reserves would be necessary to ensure that sufficient reserve funds will be available each year during the next 30 years that have not been approved by the Board or the members?

Approximate date assessment will be due:	Amount per ownership interest per month or year:
N.A.	

Total: _____

Newport Hills Community Association
Assessment and Reserve Funding Disclosure Summary
For the fiscal year ending 12/31/18
 ("Disclosure Summary")

(5) All major components are included in the reserve study and are included in its calculations. However, the following major assets are excluded from the reserve study calculations for the following reasons:

Major asset:	Reason this major asset was not included:
N.A.	

(6) Based on the method of calculation in paragraph (4) of subdivision (b) of Section 5570, the estimated amount required in the reserve fund at the end of the current fiscal year is **\$1,149,951**, based in whole or in part on the last reserve study or update prepared by Advanced Reserve Solutions, Inc. as of 1/1/18. The projected reserve fund cash balance at the end of the current fiscal year is **\$1,027,606**, resulting in reserves being **89.36%** funded at this date. The current deficiency in the reserve fund represents **\$230** per ownership interest.

(7) Based on the method of calculation in paragraph (4) of subdivision (b) of Section 5570 of the Civil Code, a reserve funding plan has been developed – see the attached projections. The assumed long-term before-tax interest rate earned on reserve funds is **1%** per year and the assumed long-term inflation rate applied to major component repair and replacement costs is **2%** per year. Full reserve study available upon request.

NOTES:

(A) The financial representations set forth in this summary are based on the best estimates of the preparer and the Board at that time. The estimates are subject to change. (B) For the purposes of understanding this Disclosure Summary: (1) "Estimated remaining useful life" means the time reasonably calculated to remain before a major component will require replacement. (2) "Major component" has the meaning used in Section 55530. Components with an estimated remaining useful life of more than 30 years may be included in the study as a capital asset or disregarded from the reserve calculation, so long as the decision is revealed in the reserve study report and reported in the Assessment and Reserve Funding Disclosure Summary. (3) The form set out in subdivision (a) shall accompany each annual budget report or summary thereof that is delivered pursuant to Section 5300. The form may be supplemented or modified to clarify the information delivered, so long as the minimum information set out in subdivision (a) is provided. (4) For the purpose of the report and summary, the amount of reserves needed to be accumulated for a component at a given time shall be computed as the current cost of replacement or repair multiplied by the number of years the component has been in service divided by the useful life of the component. This shall not be construed to require the Board to fund reserves in accordance with this calculation. (5) Based on reserve studies or the occurrence of one or more unanticipated events, the Board could increase regular assessments and/or levy special assessments, consistent with the provisions of the CC&Rs and applicable law, to fund additional reserves as it deems necessary. For example, the information contained in this Disclosure Summary includes (i) estimates of replacement value and life expectancies of the components and (ii) assumptions regarding future events. Estimates are projections of a future event based on information currently available and are not necessarily indicative of the actual future outcome. The longer the time period between the estimate and the estimated event, the more likely the possibility of error and/or discrepancy. For example, some assumptions inevitably will not materialize and unanticipated events and circumstances may occur subsequent to the preparation of this Disclosure Summary. Therefore, the actual replacement cost and remaining life may vary from this report and summary and the variation may be significant. Additionally, inflation and other economic events may impact this report and summary, particularly over an extended period of time (such as thirty (30) years) and those events could have a significant and negative impact on the accuracy of this Disclosure Summary and, further, the funds available to meet the association's obligation for repair and/or replacement of major components during their estimated useful life.
